JENKINS, Denise

I am standing for re election to take advantage of my 14 years experience as a Councillor to influence decision making on the next stage of development ensuring that it reflects our community aspirations.

My interest is focussed on employment. We have made Manjimup a beautiful place to live and I want to build on that by addressing the challenges facing economic development. We must encourage public sector investment to provide long term employment prospects and stability to existing business.

To achieve this, I believe you need a well rounded knowledge of the community, where I have lived for 58 years, with the sound understanding of the role Council plays and the ability to robustly advocate the case.

My personal philosophy has always been to be honest, open to opinion and criticism, to advocate community views and to accept responsibility for Council actions.
