SHARP, Julian

I offer a progressive and positive vision for our Shire. We are facing unprecedented challenges in many aspects of business, environment and community, and we need a local government that leads by example and is fully responsive to community concerns and aspirations for a safe, equitable and resilient future for people and planet.

I have a long term interest and involvement in land care and natural resource management, sustainable and innovative farming, community engagement and planning for the long term sustainability and endurance of small regional communities.

My focus will include the building of community 'ownership' of local governance, a more robust incorporation of community input to Council decision making and ensuring clear accountability and transparency for Council activities.
