

Improving your network

To make sure you have a safe and reliable electricity supply into the future, Western Power is making some improvements across the network.

Work to be completed

Western Power will replace approximately 270 power poles and over 98 kilometres of overhead power lines across the Shire of Manjimup.

Planned outages

Keeping the community and our crews safe throughout these works is our number one priority. Because it's not always safe to work on live lines there will be times when we will need to interrupt the power supply.

Our crews will need to complete a significant amount of work in your area so you may experience a number of power outages.

Outages have been scheduled for the following dates:

12 Jan 2016	Duncton Road, Junction Road, Weinup Road
14 Jan 2016	Properties on Muir Highway, Strachan Road
20 Jan 2016	Diamond Tree Road, Eastbourne Road, Eastbrook Road, Littlefair Road, properties on Vasse Highway and South Western Highway
24 Jan 2016	Glenpennant Road

To help you prepare we will let you know ahead of time if your home or business will be affected by this power outage.

For more details, keep an eye out for mail from us and download the Western Power smartphone App.
