After a break from local government, I want to serve my community again.

I believe the Shire of Manjimup has a lot of untapped potential that needs exemplary leadership to see our communities grow and thrive sustainably.

We have had a number of knocks over the last couple of years. We need to adjust the way we do business as a local government to see what our future is.

One example is an investment in land release, fast tracked to be able to take advantage of the lithium boom with people who reside in our communities.

Tourism and Industry are in need of direction and a strategy for growth needs to be developed that has industry buy in.

Our local government needs to and should be accountable for delivering timely and cost-effective projects and services.

Small but effective local government is something I am passionate about.

Everyone in the SOM deserves a sustainable, visionary, and prosperous future.

Working with your elected council this is what I commit to you if elected as your President.
